

INTERN CLOUD DATA HUB (F/M/X).

SHARE YOUR PASSION.

During your internship, you will be part of our Cloud Data Hub team and join us in our journey towards making our vision come true. We are a team with a diverse set of skills covering machine learning engineering and full-stack engineering and foster a fresh, open-minded and agile culture.

Intern Cloud Data Hub (f/m/x).

Job reference: 21752

What awaits you?

- Scaling out a cloud-based data ecosystem to a large enterprise.
- Curating developer content for BMW's developer portal.
- Contributing to our API strategy.
- Drive the development of applications built upon.
- Driving the general use of data across our organization.

What you should bring along?

- Major in software engineering, information systems, or adjacent studies.
- Hands-on experience with programming based on Python or similar languages.
- First hands-on experience with machine learning (incl. a general understanding of foundational frameworks).
- Foundational know-how of big data paradigms such as Apache Spark and Kafka.
- Ability to communicate clearly and effectively and coordinate efforts within a team.
- Ability to communicate complex ideas effectively – both verbally and in writing – in English and German.
- You have an aspiration to take on end-to-end responsibility.
- You are able to adapt quickly to changes in business requirements and work in an agile environment.
- You have a strong interest in emerging technologies and their evaluation and adoption where it makes sense.

Location: Munich
